Offspring smash it up live

Offspring has released nine albums in nearly 35 years. But one of them seems to loom larger than the rest. Released in 1994, Smash is known for being the highest-selling independent record of all time. The fledgling Southern California punk had two albums until he decorated his studio, and he said he had slightly higher ambitions for album number three, but didn't expect to connect as strongly as he did. We put out a record on Epitaph [gniton in 1992], which was a famous and upcoming label, and it was fine. At that time, bad religion was a big kid on the block at Epitaph. They were a huge band. We said, 'Wow, if we can make a record that we can get anywhere that's close... This is the goal'. But that was the limit of our universe. There was no way we were going to get on MTV or radio, and we didn't even think about it. If you could come up with a record that would touch what a bad religious record is doing, it would be unbelievable. Holland, who was a PhD student at the time, said he wasn't even sure singing in a rock'n'roll band was a lifestyle he could sustain. It didn't seem realistic to follow the band, he said, inging out his scientific academic ambitions. I said, 'I probably know I have to give up the band, get a real job, go to the real world', but I just didn't want to. I was 26 years old and I'm not sure what I'm doing. Here I'm playing in this little punk band with no real career in sight. What am I going to do? Giz, I was still living at home. Since then, more than 11 million albums and offspring's third album have a lasting legacy that can kill any genre of band. Holland and his bandmates are well aware of that, and despite a career that has seen them deliver more hits and expand their musical reach, they don't hide from the fact that smash is the album that makes the most sense for many fans. Case in case: The band will return to Australia next month to headline the first iteration of the Good Things festival, playing the smash in fullness. It's not clear what will happen, Holland says. Are people really so many on record in this one? We've done it here and there over the last few years and the reaction has been amazing. It's a great feeling because I'm very proud of the record and still see people with it. It somehow feels like standing the test of time. It's a great opportunity for fans to reconnect with these formative records. But it's also an opportunity for the band to revisit their long-forgotten songs. Some of them are a little stronger than others in that they have relativity at different stages of people's lives, Holland says. Songs like Pride are just one of those things that everyone thinks they can empathize with. It doesn't necessarily age much. Whereas songs like 'Nitro' are more Come in on your own, and in a way it feels like our past. Punk rock has made a huge leap into the mainstream, with albums such as Smash and Green Day's Dookie in 1994 giving the genre a new kind of gloss, with mainstream radio formats working more and appealing to a larger audience. For offspring, this new sonic take on punk rock was no accident. Longtime producer Tom Wilson had a vision to make punk rock sound better, and the band was wonderful and truly on board. Tom and I talked a lot about stuff, Holland recalled. We talked about the theory behind it. I learned a lot from Tom in the process. He said: 'I love the energy of punk rock, but I just can't stand it like there's noise. No place to breathe. So we started thinking, 'How can I have punk rock and make it sound good?' One of the things I liked and started with smash was pulling out an instrument, which was a way to produce better sound. I know it sounds very intelligent and very rock'n'roll, but we really approached it that way. 'How can you embrace this great energy and rebellious spirit that punk has?' has a successful record and vertigo highs are often behind the battering pressure to replicate that success on their next album. Dexter Holland is very open about what his band had hoped for after the smash. I'd say I didn't feel pressured, he says, because every band and artist seems to be talking, but that's completely untrue. You feel completely pressured. I know smash part 2, they expected, but I didn't have that kind of song written. I felt like we couldn't do that. I wanted to be a band that I could stick to for a while. It is considered the unofficial anthem of the band. [1] The single was the second release of the band's machine gun etiquette album, which was listed as a smash-up (Part II). The B side of the single was strength. [2] The production smash was produced by Roger Armstrong with the it-upband. It consists of two-part forms: introducing melodic instruments segueing into lively pop-punk songs. Instead of advocating a political revolution, the song's lyrics criticize those who fall into hippie culture (blow wave hairstyles and Glastonbury hippies3]) Release Chiswick reissued the single on budget Big Beat Inn in February 1982. [4] The single was also published in Australia, Germany, the Netherlands, and Spain. Smash It Up has been boycotted by BBC Radio 1 due to its anarchic lyrics, which topped the UK singles chart at number 35. [6] In November 2004, Ace Records reissued the single on cd, with an alternate version of the song (including the third and fourth parts of the previously unreleased Smash It Up) and a video directed by Martin Baker, it added. The promotional case performed a smash-it-up (as well as I can't be happier today) on the BBC2 television show Old Grey Whistle Test in 1979. [7] The cover of a song written by Zaisson in other media appeared for a few seconds in the 1995 film Batman Forever. The song appeared as a 1978-era track on console-based game Driver. Parallel Lines. The song appears in the 2010 film Funny Stories. The song also appears in dc universe titan's last credits, season 2, and episode 10's last credits.
